

Parallels Desktop[®] 6 for Mac Enterprise Edition

Support **Windows[®]** based business applications for Mac users with a configurable, policy compliant solution that **easily fits into existing IT business processes.**

Windows on Mac, smarter.

Run Windows based business programs seamlessly side-by-side with Mac applications; Users can drag-and-drop, and copy-and-paste between Windows and Mac, and use Mac OS X keyboard shortcuts in Windows applications. Reduce training time and support calls by simplifying the end user workflow by running Windows programs like they are native to the Mac.

Make compliance officers happier.

Support corporate compliance directives with the Parallels Desktop 6[®] for Mac Enterprise Edition. Deploy a streamlined business GUI eliminating 3rd party product installation options, in product notifications and individual registration requirements. Enforce corporate change management with a configurable software update policy and a local update server option. Improve endpoint security compliance with virtual machine configuration capabilities for lockdown and encryption.

Administrators rejoice!

Simplify administration by pre configuring desktop packages including ready to go virtual machines in support of streamlined mass deployments. Unified volume licensing reduces key management hassles and improves auditability. Deploy installation packages through standard software distribution and systems management tools fitting into existing IT business processes. Keep it all running smoothly with priority business support as well as ongoing software updates & version upgrades.

The world's best selling, top rated, most trusted solution for running Windows applications on the Mac.

Parallels Desktop® 6 for Mac Enterprise Edition lets IT teams say YES to MACs while meeting their own internal requirements.

Provide the best day to day experience for users

- Launch Windows programs **2 times faster** than other solutions
- Choose how much **Mac and Windows blend together** with simple profiles when setting up a new virtual machines
- **Seamlessly run** local Windows applications regardless of network connectivity

Meet company compliance requirements on the endpoints

- Satisfy change management standards with a **configurable software update policy** and optional local software update server
- Keep users internal with a **customizable request support** menu action
- Improve endpoint compliance with a **streamlined business GUI** eliminating 3rd party product options, stopping direct communications from Parallels and removing the individual registration requirements

Simplify mass deployments & administration

- **Package builder application** & detailed mass deployment guide helps to setup and administer dozen, hundreds or thousands of clients
- Create **preconfigured installation packages** that may also include virtual machine gold images and configuration instructions, deploy through standard software distribution tools
- **Unified volume license** simplifies endpoint installation, centralized key management and reduces license compliance audit risk
