

# When AI moves from experimentation to execution, Microsoft 365 E7 provides control.

**Microsoft 365 E7 is designed for organizations scaling AI and agents – making control, identity, and governance essential.**

Built to support enterprise-scale AI and agents across complex environments, it offers annual plans for 10 to 9,999 seats and 1,400+ connectors to power your agents.

Annual plans for

**10 to 9,999**

seats

**1,400+**

connectors to power your agents

## Microsoft 365 E7 provides AI and agent capabilities that can deliver:

**30%**

gains in developer efficiency

**30%**

boost to employee productivity

**40%**

reduction in costs

**50%**

acceleration in go-to-market speed

## Microsoft 365 E7 includes support for:

**Productivity**  
Microsoft 365 apps, OneDrive, SharePoint, Teams, Windows, Power BI Pro

**Security and compliance**  
Entra for identity and access management, Defender for threat protection, Purview for data security and compliance, Intune for endpoint and device management

**AI**  
Built-in Copilot, Copilot Studio and Agent Builder, agent library, Work IQ for AI grounded in personal and work data

**Agent Management**  
Agent 365 for monitoring, managing, and securing agents

## Unlike other platforms, Microsoft 365 E7 solves issues such as:

|           |           |           |                       |                 |               |                         |
|-----------|-----------|-----------|-----------------------|-----------------|---------------|-------------------------|
| Siloed AI | AI sprawl | Shadow AI | AI that doesn't scale | Safe AI scaling | Identity debt | AI governance by design |
|-----------|-----------|-----------|-----------------------|-----------------|---------------|-------------------------|

**Not ready to scale AI yet?**  
**Start with secure Copilot adoption before moving to Microsoft 365 E7.**
