Proof of Value for Microsoft 365 Copilot

Discover the power and potential of Microsoft 365 Copilot

As organizations explore the integration of Microsoft 365 Copilot into their workflows, it's natural to have questions not only about how to effectively implement this solution but also about how end users can unlock its added value, navigate security and compliance risks, and adequately prepare for this transformative journey.

A guided evaluation experience

This meticulously designed engagement empowers your workforce to fully embrace the business value of workplace AI. **Proof of Value for Microsoft 365 Copilot** is a three phased engagement that assists you with realizing value from the initial purchase and deployment of licenses to expanding your Microsoft 365 Copilot footprint to a larger portion of your organization.

This engagement focuses on proven scenarios to enable you to see the value quickly, and have the confidence to invest more fully in Microsoft 365 Copilot. It is aimed at customers that have 300 or more Microsoft 365 users and supports the evaluation of Microsoft 365 Copilot.

What we cover

- Identification of high-value Copilot scenarios, aligned with your organizations' common use cases

- Champions' onboarding and training to ensure their active engagement moving forward

- End users' training to ensure all trial participants are enabled to use Microsoft 365 Copilot in their daily work

- Guidance in understanding and interpreting the Microsoft Copilot Dashboard data and Microsoft 365 Copilot usage reports.

Personalize your Copilot journey with our add-on modules

SoftwareOne Copilot Advisory Service comprises selectable modules intended for organizations who are deploying Microsoft 365 Copilot licenses.

Technical enablement module	Security module	Information protection module	Adoption module
We review your organisations Microsoft tenant settings and apply the technical prerequisites for Copilot. Enable Copilot for up to 1000 users and enable the Copilot Dashboard to monitor the usage statistics.	We review, implement, deploy and test new configurations for identity/access and endpoint protection like conditional access policies and Microsoft Defender.	We set up OneDrive, SharePoint, and Data Loss Prevention, and help you get started with Microsoft Purview for governance.	We help you tailor the Copilot adoption journey to better fit your unique needs.

Choose SoftwareOne as your trusted partner for a successful Workplace AI transformation

By leveraging Microsoft's recommended best practices and the expertise of SoftwareOne's consultants, organizations can confidently embark on a pilot phase for Microsoft 365 Copilot. Our consultants will guide you through the process, ensuring that you end the pilot with a clear roadmap to scale your Microsoft 365 Copilot deployment. With our depth of expertise in Data and AI and our participation in the Microsoft 365 Copilot early adopter's program means we've tried, tested and enabled many clients to envision and discover their readiness for Copilot. As a result, we have become the trusted partner for organizations seeking support in their transformative journey. Choose SoftwareOne and accelerate your transformation with confidence.
