SoftwareOne announces CDP scores for 2025 climate change disclosure

The company's performance reflects commitment to climate action and transparency

Stans, Switzerland – December 11, 2025. SoftwareOne, a global leader in software and cloud solutions, today announced the individual CDP Climate Change disclosure scores for the 2025 assessment. Our continued engagement with CDP demonstrates our commitment to aligning with international standards for environmental reporting.

Crayon, which combined with SoftwareOne in July, achieved an improved **A- score in the 2025 CDP Climate Change disclosure**. Crayon's 2024 score was B-. SoftwareOne received a score of C in 2025, which is the same as the previous year.

CDP, previously called the Carbon Disclosure Project, is a globally recognized environmental disclosure system that helps companies measure, manage, and report their climate, water, and sustainability impacts. By participating in CDP, organizations demonstrate transparency and accountability while aligning their operations with international best practices for environmental stewardship.

"These CDP scores, validated by an independent global standard, reflect our strengthened climate strategy and transparency," said Jon Birger Syvertsen, Chief Strategy & Integration Officer at SoftwareOne. "We remain committed to embedding sustainability across our business and supporting our clients and communities, because we believe this delivers tangible business value for us, our customers and our partners."

For the 2026 CDP disclosure cycle, the combined organization will submit a unified disclosure under the SoftwareOne name.

Individual company scores for 2025 will be available to the public on [the CDP website](#) starting January 2026. Previous scores are already accessible.

ABOUT SOFTWAREONE

SoftwareOne is a global software and cloud solutions provider. With a presence in over 70 countries and a team of around 13,000 professionals, we combine global scale and local expertise to help clients optimize costs, accelerate growth, and navigate complex IT environments with confidence.
