

DIGITAL CONTINUITY

Digital transformation is the end to end process of enabling people, process and technology to leverage cloud computing to its fullest capability to provide automation, security, stability and innovation of services for your end customers all based in the cloud. Today's business environment is unprecedented and SoftwareONE wants to ensure your digital transformation

efforts are not derailed. Our digital continuity service takes the key points of our digital transformation service and distills it down to a three week remote engagement to provide adaption of key services to the cloud, continuity of existing technological capabilities and growth for your longer-term initiatives.

“Now is the time to reassess digital initiatives—those that provide near-term help to employees, customers, and the broad set of stakeholders to which businesses are increasingly responsible and those that position you for a postcrisis world. In this world, some things will snap back to previous form, while others will be forever changed. Playing it safe now, understandable as it might feel to do so, is often the worst option.”

McKinsey

SoftwareONE Addresses the Key Customer Challenges of Digital Continuity

Throughout a 3 week time frame the experts at SoftwareONE will walk you through the Digital Continuity process to identify where your current and future digital needs lie, structure the solution for today and longer-term while providing for continuity and growth.

Identification of the digital needs, and the structuring of the solutions for adaption, continuity, and growth.
