

SLMAdvanced and SAMSimple Services Are Now ISO 27001 Certified

Cybersecurity is a top priority for most technology companies, and most invest heavily in a proper security strategy. As a technology partner to over 65,000 organizations, SoftwareONE understands the requirement to be diligent in protecting our customers' valuable data.

SoftwareONE's business is automated, digitized and online – therefore confidentiality, integrity and availability are of the utmost importance to us. Recently, SoftwareONE has been recognized with ISO 27001 certification for our SLMAdvanced and SAMSimple services.

A systematic approach consisting of processes, technology, people and security policies is always in place at SoftwareONE. All employees, consultants, contractors and temporary staff using SoftwareONE information systems or sharing our data are required to read and adhere to a specific set of [information security standards](#).

Achieving ISO 27001 certification for SLMAdvanced and SAMSimple proves that SoftwareONE is:

- › Protecting our customers' information to prevent it from getting into unauthorized hands.
- › Ensuring the collected information is accurate and can only be modified by authorized users.
- › Being independently assessed to an international standard based on industry best practices.

We understand now more than ever that your organization's data must be kept secure. ISO 27001 certification demonstrates that we have identified the risks, assessed the implications and put in place systemized controls to limit any damage to your organization's data. We strive to protect you as an organization along with your data, and we work to ensure our processes comply to the highest security standards so no one can get illegal access to your information.
