

# OPTIMIZED SLM WITH THE DIAGNOSTIC

SOFTWARE LIFECYCLE MANAGEMENT IS THE COMBINATION OF PROCUREMENT AND SAM TO MAXIMIZE THE VALUE OF YOUR SOFTWARE AND CLOUD PORTFOLIOS.

## Business Challenges

- › Cost - understand your software consumption status and ROI
- › Leadership support - executive buy in is key for SLM maturity
- › Processes - disconnect between internal and external parties
- › Data - do you have a clear understanding of the tools being utilized

## Why The Diagnostic

The Diagnostic from SoftwareONE provides a 360 degree view of your entire software estate from procurement to retirement, addressing common customer challenges around SLM (the combination of SAM & procurement) in real-time.

## The Value of The Diagnostic

Every organization desires clear visibility across its entire software estate and The Diagnostic provides that and more: increased business productivity & efficiency, cost optimization and reduced risk.

Bringing access to a real-time SLM assessment to the organization and top stakeholders can bring your business goals to reality in a faster manner. Once the initial assessment is complete the process becomes automated over time.

ROI and Tool Evaluation Benefits	
<h3>ROI Evaluation</h3> <p>Have you struggled to build a solid business case to fund your SLM initiatives and projects? Our ROI evaluation provides:</p> <ul style="list-style-type: none"> <li>› Detailed and documented industry benchmarks that is validated against your maturity assessment</li> <li>› Review of vendor optimization, unused software and financial goals</li> <li>› Align a comprehensive ROI assessment including NPV, cost of capital, etc to determine the long-term SLM strategy</li> </ul>	<h3>Tool Evaluation</h3> <p>The people and process around SLM are key but you also need to ensure you have the right tool in place for your organization:</p> <ul style="list-style-type: none"> <li>› As an independent consultant we can assess the industry's leading tools based on your maturity needs and not on industry trends</li> <li>› Comprehensive Requirements &amp; Functionality review coupled with an existing vs new tool evaluation so as not to waste prior tool purchases</li> <li>› Customer is provided a tool evaluation report and if needed a demonstration of the chosen tool for a proof of concept</li> </ul>
