

4 TOP CONSIDERATIONS FOR YOUR MIGRATION TO MICROSOFT 365

Microsoft 365 helps businesses to empower their employees on their digital transformation journey. The bundle delivers the most advanced innovations in management, collaboration, enterprise security, and business analytics, through cloud services. Here are four questions, you should ask yourself as you consider purchasing and implementing M365.

TRUST

Is our organization, data and people sufficiently protected?

48% of all corporate data is stored in the cloud compared to 35% three years ago.¹

COLLABORATION

Will we be able to create a productive workplace?

Information workers can save **4 hours per week** from improved collaboration and information sharing - saving **more than \$14.4 million** over three years.²

INTELLIGENCE

Do we gather meaningful insights, which help us make more informed and faster business decisions?

48% of organizations say cloud BI is either "critical" or "very important" to their operations.⁴

MOBILITY

Can we enable our people to work from anywhere and anytime?

We live in an age of BYOD workers and flexible working hours. That's why **42%** say providing access to data anytime, anywhere, is the main driver for cloud adoption.³
