

FROM ON-PREMISES END-OF-LIFE TO MIGRATION AND MODERNIZATION

Is your on-premises enterprise software approaching end of life? This could be an opportunity to modernize your business with a move to the AWS Cloud.

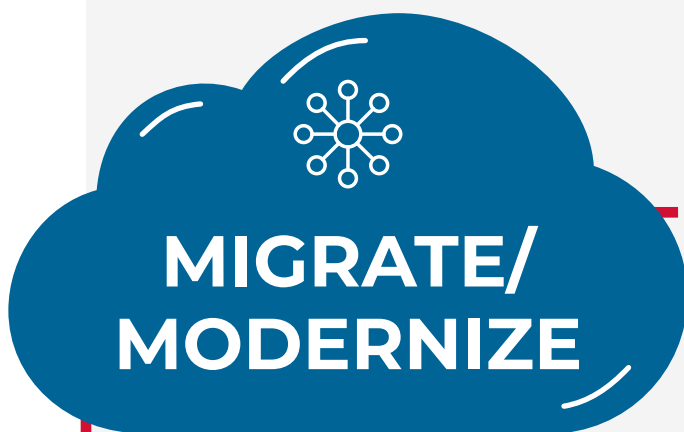

Your route to the AWS Cloud

- Build a business case for migration with an Optimization and Licensing Assessment (OLA).
- Discover your on-premises and cloud resource usage, licensing costs and optimization strategies.
- Learn if you qualify for funding, tools and support through the AWS Migration Acceleration Program.

- An Application Modernization Advisory (AMA) helps decide between replatforming or refactoring.
- Build your landing zone, migration plan and operating model.
- Review your cloud security policies and begin a pilot migration for your landing zone.

- Begin your full migration.
- **Replatform:** modify applications > take advantage of the cloud's capabilities.
- **Refactor:** rearchitect code and database technologies > optimize migration options > gain commercial efficiencies.

READY TO START MAPPING OUT YOUR JOURNEY TO THE AWS CLOUD?
