

ENABLE COMPLIANCE and SAVINGS with SoftwareONE's SAMSimple

Software Asset Management (SAM) is a key business strategy focused on overseeing and optimizing your fundamental business resource - software.

Where SAM can help: Facts from the market

60%

only of software spend is "under management" by Procurement.
(CPO Agenda)

30%

cost reductions enterprises can achieve by implementing software asset management.
(Gartner)

89%

of organizations cite compliance as their top SAM goal.
(SAMS Europe & USA)

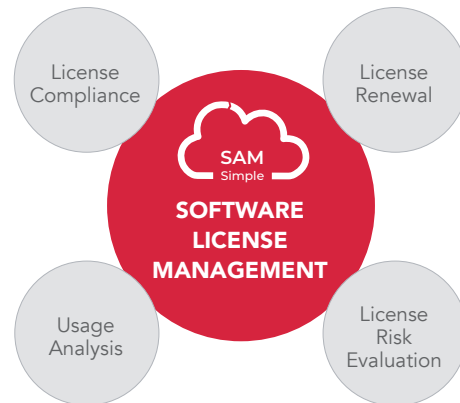

With SoftwareONE's SAMSimple managed service we help you understand your compliance position, enable your cost savings potential and be safe during an Audit.

Gain visibility by collecting accurate deployment data across diverse hardware, operating systems, virtual environments and cloud services.

Renew your contracts on time and in line with your real needs with proper contract and license management and information about real usage.

Get the most out of your software investments with our licensing experts.

Be prepared and safe during an audit.
