

AWS BUSINESS PRODUCTIVITY ADVISORY WORKSHOP

The rate of cloud services adoption has increased significantly. The cloud can offer higher levels of security, flexibility, efficiency, productivity and scalability, as well as lower costs compared to traditional IT infrastructures – making it an appealing business option. However, shifting workloads to the cloud requires careful planning to meet the unique needs of your own business model.

In the AWS Business Productivity Advisory Workshop, we help you define exactly what you want to achieve with your new cloud solution. Together, we work out recommendations for the cloud, based on your corporate goals.

This allows you to identify and realize the potential productivity gains. Afterwards, we will review your existing infrastructure and determine the optimal future-state architecture based on your business needs. Exceptions to the standard Business Productivity Advisory services must be clarified up front.

WORKSHOP PACKAGES OVERVIEW

BASIC	ADVANCED	OPTIONAL
<ul style="list-style-type: none"> • Analysis of existing infrastructure • SoftwareONE recommends the initial cloud strategy: (initial concept, basic requirements for the cloud, risks, cost estimate for PoC) 	<ul style="list-style-type: none"> • Compute • Storage • Database • Migration • Network & CDN • Security, Identity & Compliance • Analytics 	<ul style="list-style-type: none"> • Multi Cloud • Licensing Advisory • ROI analysis, cost savings • Privacy / Data Security

The Basic and Advanced Workshop includes two days for on-site analysis as well as three days for documentation. The documentation and diagrams of your future environment provide you with a comprehensive cloud overview.

SoftwareONE will help you align your IT team to your most important business goals. The results of the AWS Business Productivity Advisory Workshops are actionable cloud recommendations, which are used to highlight different solution scenarios. This optimally prepares you for a proof of concept. Use the SoftwareONE cloud services to improve your productivity.

GOAL OF THE WORKSHOPS

- Preparation for a proof of concept
- Analysis of the infrastructure
- Demonstration of solution scenarios
- Recognition of the "Daily Challenges" for IT
- Understand / recognize needs
