

SoftwareONE BackupSimple

ENTERPRISE GRADE BACKUPS FROM A COST-EFFECTIVE HOSTED SERVICE

Ensuring your data is backed up and available becomes increasingly complex as your business

expands to include on-premise and multiple cloud service providers. With every additional provider, your data gets more isolated. It requires specialized skills to architect and operate dedicated backup solutions. These backup pains will only increase as your IT landscape grows and compliance gets ever more demanding.

SoftwareONE offers fast and lasting pain relief through "BackupSimple".

BackupSimple is a comprehensive solution which centralizes all your backups. From Microsoft Azure and AWS through to Office 365 and Salesforce, BackupSimple provides a single secure, scalable and resilient storage point which you control.

With a market-leading range of backup targets and simple pricing, per server or user, backup and recovery become simple. Simple setup. Simple support. Simple control. All with no upfront capital cost or financial commitment.

Download. Install. Connect.

Start backing up.

IT'S THAT SIMPLE

- An Enterprise grade backup system without the complexity.
- A single pane of glass to manage and backup on-premise, cloud hosted instances, and Office 365 data.
- Backup securely to your Azure storage, from anywhere, without complex setup and administration.
- Data is de-duped, compressed and encrypted in transit and at rest.
- All management is through a highly resilient web portal hosted by SoftwareONE. Disaster recovery is built in.
- Combining SoftwareONE's deep expertise across Microsoft Azure and Office 365 with sophisticated data management technology from CommVault, BackupSimple offers the most comprehensive data availability solution on the market.
